

The Fatality of Drugs

With the Government actively combatting drug addictions, PERTIWI also joined in this battle by providing preventive programmes. A PERTIWI memorandum was submitted to the Anti-Drug Division at the Prime Minister's Department with recommendations for schools to conduct the 'Colloquium on Developing Self-Resilience' programme.

PERTIWI is aware that this problem cannot be solved easily and in a short period of time - a change of attitude and outlook towards drugs is required. However, efforts to eliminate drugs should be maintained, even though the techniques and approaches may vary with the changing times.
